DETAILED ACTION

Claim Objections

Claims 20- 23 is objected to under 37 CFR 1.75(c) as being in improper form because claim 20 does refer back in the alternative only and claim 23, a multiple dependent claim cannot server as basis for another multiple dependent claim either directly or indirectly. See MPEP § 608.01(n). Accordingly, these claims have not been further treated on the merits.

Specification

The abstract of the disclosure is objected to because the abstract must be submitted on a separate page with no other material thereon. Correction is required. See MPEP § 608.01(b).

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Claims 1-19 are allowed in setting forth the method for controlling a home electronics system comprising a plurality of components, the method being managed independently of a user and invoked on receipt of a command, comprising the steps of sensing an operative component in the system; adapting the command to produce at least one substitute command in dependence on the operative component; and for each substitute command, communicating the substituted command to a component in the system, which component being operable to respond to the substitute command.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Haroun et al, Piepho et al, and Chamberlain are cited as showing systems and methods for automatic configuring an appliance.
